largely to the presence of challenging terrain and steep slopes,
and in the south and other edges of the site.

The proposed Master Plan outlines all aspects of physical development and planned land use to support the academic and enrollment goals of CSUEB at its Hayward campus over the next 21 to 22 years, through 2030. The primary objective of the Hayward Campus Master Plan is to comply with the CSU system-wide requirement to maintain a master plan for guiding campus development and meeting the educational mission of the University, as defined in the California Education Code.

Existing facilities on the campus can support a student enroll

enrollment and academic activities, provides an infrastructure program that outlines the development of an additional 1.1 million square feet of non-residential building space on the campus, and the development of approximately 3,000 student beds and an

continued to the flattest portion of the site, which is approxim
180 acre
