in allation and road and in a chieftain and ceremonial  
leather he held of Pa ca cancha date back to the reign  
of the Inca king To a Inca (son of the king Pachacuti  
Inca Yáaní), a small image in the late 15th century  
(Kendall, 1985). Based on a chief's, ceremonial, and other  
affiliation found in a collection, he believed that Bingham  
had a Pa ca cancha and Pa allaca can be assigned  
to the period of the Inca control of the Urubamba Valley,  
from ca. mid-15th to early 16th century (Bingham, 1913;  
Kendall, 1985; MacCord, 1923).

Over the last 20 years, in addition to the aforementioned  
works by Kendall, there have been much effort  
to identify Inca and pre-Inca occupation along the "Sa-

erived in the HVR 1 region. From the characteristic ion of
