

we, the people

RESULTS

emissions by 80% by mid-century

With the passage of the Climate Change Act, we have set a clear path to a low-carbon future.

The Act sets a target to reduce greenhouse gas emissions by 80% by 2050 compared to 1990 levels.

It also sets a target to reduce emissions from electricity generation by 35% by 2020.

These targets are ambitious, but they are necessary to meet our climate change obligations.

The Act also sets a target to reduce emissions from electricity generation by 35% by 2020.

These targets are ambitious, but they are necessary to meet our climate change obligations.

The Act also sets a target to reduce emissions from electricity generation by 35% by 2020.

These targets are ambitious, but they are necessary to meet our climate change obligations.

The Act also sets a target to reduce emissions from electricity generation by 35% by 2020.

These targets are ambitious, but they are necessary to meet our climate change obligations.

The Act also sets a target to reduce emissions from electricity generation by 35% by 2020.

These targets are ambitious, but they are necessary to meet our climate change obligations.

The Act also sets a target to reduce emissions from electricity generation by 35% by 2020.

These targets are ambitious, but they are necessary to meet our climate change obligations.
